RHEUMATOID ARTHRITIS STUDY

If you have rheumatoid arthritis (RA), we invite you to participate in an ongoing study at East Carolina University’s Visual Motor Lab:

* The study is designed to assess movement patterns of individuals with RA to help inform future treatments.

* Each trial takes about two (2) hours to complete and requires a saline EEG cap.

* Those who complete the study will be compensated for their time with a $25 gift card to Target.

For more information, contact Julianna Ethridge at ethridgej20@students.ecu.edu or schedule a trial using the QR code or link.
